SUBJECT:
FDXS-F(9) phase out & FDXM-F3 extended connectivity

Corrected version: 02.06.2017

Correction(s): in the list of compatible outdoor units the last point was "R-32 MXS", which was a mistake, as the MXS multi outdoor unit has R-410A refrigerant. This has been corrected in this version.

Dear Madam
 Dear Sir,

This is to inform you that from 06/17 onwards the whole FDXS-F(9) split duct indoor unit range will be phased out. The following units are in scope of this decision:

- FDXS25F
- FDXS35F
- FDXS50F9
- FDXS60F

In order to push forward with our R32 strategy in split series and ensure the stable substitution of these units, the R-32 FDXM-F3 split duct indoor units (sales launch: 06/17) will have extended connectivity.

This means that the new FDXM-F3 range will be

- Connectable to the R-32 **RXM-M9** split pair outdoor units
- Connectable to the R-32 **MXM-M9/MXM-N** split multi outdoor units
- Connectable to the R-410A **RXS** split pair outdoor units
- Connectable to the R-410A **MXS** split multi outdoor units

Please find below an overview table of the possible indoor & outdoor combinations:

Pair/Multi	Refrigerant	Exist/New	Outdoor unit	Indoor unit		
				Existing		New
				FDXS-F	FDXM-F	FDXM-F3
Pair	R410A	Existing	RXS-L	✓	-	✓
	R32		RXM-M	-	-	-
Multi	R410A	Existing	RXM-M9	-	-	✓
			MXS-	✓	-	✓
	R32	New	MXM-M	-	✓	-
			MXM-M9 / MXM-N	-	-	✓
