Date: 12/10/2017
Author: Andras Koczka

SUBJECT:
FLXS-B(9) phase out from 09/2018

Dear Sir,
Dear Madam,

With this Rapid News we would like to inform you that from September 2018 the production of the FLXS-B(9) Flexi Type split range will be stopped and the unit will be phased out after the stock is sold out.

Please also note that currently there is no development planned on any further generation for this range, meaning the Flexi range will be abolished. As a substitution model please consider the newly launched Sky Air FHA-A ceiling suspended unit with better specifications, pair and multi connections, and R-32 refrigerant.

The units affected by this decision:

FLXS25B
FLXS35B9
FLXS50B
FLXS60B

Thank you for your understanding.

In case of questions please do not hesitate to contact your Daikin representative.
